Date:2025/12/12

Letter of Internship Completion

This is to certify that **Anita Gurung** has successfully completed the **SEO Internship** at **Sathi Edtech Pvt. Ltd.** from **1st day of September in the year 2025** to **12th Dec 2025.**

The internship program was conducted over a period of 90 days, with a commitment of 8 hours per day in a fully onsite work environment. During this period, Anita actively contributed to SEO activities, including conducting keyword research, optimizing on-page elements, assisting with technical SEO audits, tracking website performance, and supporting content optimization efforts. Anita also coordinated with the content and marketing teams to ensure SEO best practices were implemented across projects.

She demonstrated professionalism, strong communication skills, and a proactive learning attitude throughout the internship. Her contribution was valuable to the team, and we appreciate the dedication and enthusiasm shown during the tenure.

We wish **Anita** continued success in all future professional endeavors.

Sincerely,
Kunal Sah
Sathi Edtech Pvt. Ltd.

ACKNOWLEDGEMENT

I would like to express my deep gratitude to my supervisor **Mr. Paras Mishra** for helping us throughout this internship and for this guidance, encouragement and valuable suggestions.

I am also deeply indebted to my coordinator **Mr. Pratik Joshi** for constantly giving us information related to the internship and for guiding us through the documentation process of this internship. This internship also provides us good opportunity to acquire how to work with a team and to develop research skills.

I would also like to thank my company mentor, **Mr. Kunal Sah**, for the guidance and support during my time at **Sathi EdTech Pvt. Ltd**. The willingness to share their knowledge and experience with me has been instrumental in my learning and growth as a SEO specialist.

I would also like to thank my parents and friends who helped us a lot in finalizing this internship within the limited time frame.

Last but not the least, I am also eternally thankful to my friends who have helped us by giving valuable insights on my internship and for always supporting and encouraging me.

Anita Gurung (35402047)

ABSTRACT

Search Engine Optimization (SEO) is the process of improving the visibility and ranking of websites such as TalentSathi, Hireshore, Fishaqua, and InternSathi in search engine results. The ranking depends on how well these websites are optimized using relevant keywords, high-quality content, and proper technical improvements. SEO helps generate organic traffic, which can lead to new and returning customers. To achieve better performance, tools like Ahrefs, SEMrush, Google Search Console, Google PageSpeed Insights, Ubersuggest, Screaming Frog, and Neuron Writer are used for keyword research, performance tracking, technical audits, and content optimization.

Keywords: *Ahrefs, Backlinks, Competitor Analysis, Google Search Console, Keyword Research, Off-Page SEO, On-Page SEO, SEMrush, Technical SEO*

CHAPTER 1

INTRODUCTION

1.1 Introduction

An internship is a professional learning experience that provides meaningful, practical work opportunities related to a student's field of study or career interests. It allows students to explore career paths, gain hands-on experience, and develop relevant skills, while also benefiting employers by introducing fresh perspectives, energy, and potential future talent. A well-structured internship includes a defined work schedule or administrative tasks, clear job or project descriptions to guide the intern's responsibilities, support for the intern in setting and achieving learning goals, and regular feedback to enhance the intern's development.

This report provides a comprehensive overview of my three-month SEO internship at Sathi EdTech Pvt. Ltd. The internship allowed me to experience the dynamic work environment of a digital marketing team, deepen my knowledge of SEO strategies, and expand my technical, analytical, content writing and research skills. During this internship, I gained insight into various facets of SEO, including on-page optimization, off-page strategies, technical SEO audits, content writing and content marketing techniques. I also explored tools such as Google Analytics, Google Search Console, SEMrush, and Ahrefs.

TalentSathi is an online platform that connects skilled individuals with job opportunities and helps companies find qualified manpower. It acts as a bridge between talent and employers, supporting career growth and recruitment. In addition, the website provides recruitment services by helping organizations find and hire skilled manpower, effectively connecting employers with qualified and talented individuals. This project involved conducting comprehensive keyword research to identify high-traffic, low-competition keywords, optimizing meta titles, descriptions, headers, and content for search engines, implementing technical SEO improvements such as enhancing website speed, fixing broken links, and improving mobile usability, as well as building backlinks through outreach campaigns and analyzing competitor link profiles.

1.2 Problem Statement

Sathi Edtech Pvt. Ltd., along with its platforms such as InternSathi, TalentSathi, Fish Hut Aqua, and Hireshore, was encountering challenges in improving its organic search presence. Even while operating in highly competitive industries, these platforms were unable to secure top positions on Search Engine Results Pages (SERPs) for important keywords. A preliminary evaluation revealed several critical factors that were negatively affecting their SEO performance:

- **Low Online Visibility:** TalentSathi does not consistently appear among the top results on search engines, making it difficult for job seekers and employers to discover the platform. This reduces brand awareness and limits its ability to reach a wider audience.
- **High Competition:** The recruitment industry is highly competitive, with many job portals targeting the same keywords and audience. This makes it challenging for TalentSathi to stand out and secure higher rankings without strong SEO strategies.
- **Limited Traffic:** Due to weak SEO performance, the website may receive fewer visitors. Lower traffic results in fewer job applications, reduced employer engagement, and missed opportunities for growth.

1.3 Objectives

The purpose of the project is to optimize the talentsathi.com website using various search engine optimization techniques and get it listed among the top pages of google.

The goals of the project are:

- To get website listed in the top pages of the search engine.
- To optimize page and content creation website of talentsathi.com and make content easy to share and optimized for viral spreading.

1.4 Scope and limitations

1.4.1 Scope

The scope of the SEO strategy implementation during the internship included the following:

- Identifying and targeting high-performing keywords to improve website visibility.
- Optimizing meta titles, descriptions, headings, and image alt text to align with search engine best practices.

- Enhancing website performance, including fixing broken links, improving site speed, ensuring mobile responsiveness, and resolving crawlability issues.
- Developing a link-building plan and guest posting to improve domain authority.
- Implementing local optimization techniques, such as GMB.
- Using tools like Google Analytics and GSC to track performance, measure progress, and generate actionable insights.

1.4.2 Limitations

The internship was limited by several factors, including the short three-month duration, which restricted the implementation of long-term SEO strategies. Additionally, limited resources constrained the use of premium SEO tools and advanced marketing campaigns. The work primarily focused on optimizing the company's main website and a few associated platforms, while the scope of content creation was restricted due to limited time and expertise to produce a large volume of new material. Furthermore, reliance on free or trial versions of SEO tools meant that some advanced features were not accessible. The absence of physical offices in multiple locations also limited local SEO efforts to a specific geographic region.

1.5 Report Organization

The report comprises of five extensive chapters, which are briefly discussed below:

Chapter 1 provides introduction, objectives, problem statement, scope, and limitations of the internship.

Chapter 2 gives an overview of the organization, its structure and the working domains relevant to the internship.

Chapter 3 covers background study, research and theories related to the project undertaken during the internship.

Chapter 4 details the tasks, activities and responsibilities performed during the project, along with weekly logs.

Chapter 5 summarizes the project outcomes, key findings, acquired skills and future recommendations.

CHAPTER 2

INTRODUCTION TO ORGANIZATION

2.1 Organization Details

Figure 2.1: Logo of Sathi EdTech PVT.LTD.

Organization Name: Sathi EdTech PVT.LTD.

Sathi EdTech is a leading tech recruitment firm committed to bridging the gap between exceptional talent and innovative companies. As the parent company of InternSathi, TalentSathi and SathiJob.com. Sathi EdTech offers a comprehensive range of recruitment services tailored to meet the unique needs of the tech industry.

Table 2.1:Organization Detail of Sathi EdTech PVT.LTD

Name:	Sathi Edtech Pvt. Ltd.
Established Date:	2079 BS
Website:	https://sathiedtech.com
Email:	sathiedtech@gmail.com
Contact Number:	+977 977 9802346002
Location:	Bagdole Height, Inar Chowk, Lalitpur, Nepal

2.2 Organizational Hierarchy

The organizational hierarchy depicted in the figure has the following positions, listed in order of highest to lowest authority:

- CEO (Chief Executive Officer) – The top executive responsible for overall leadership, strategy, and decision making within the organization.
- Manager – Reports to the CEO and oversees the daily operations and performance.

Department Heads:

- Marketing – Develops and implements marketing strategies to promote the company's products or services.
- SEO Specialist – Optimizes the company's online presence to improve search engine ranking and website traffic.
- Developer – Design, builds and maintain the company's software or website infrastructure.
- Graphic Designer – Creates visual content for marketing materials, websites and branding.
- HR – HR manages hiring and employee support for smooth operations.

Subordinates:

- Digital Marketer – works within the marketing team, focusing on digital marketing strategies, including online advertising and campaign management.
- SEO Intern – Assist the SEO Specialist with tasks such as keyword research and content optimization to gain practical experience in search engine optimization.
- HR Intern – An HR intern assists in recruitment, employee onboarding, maintaining records, and supporting daily human resource activities.

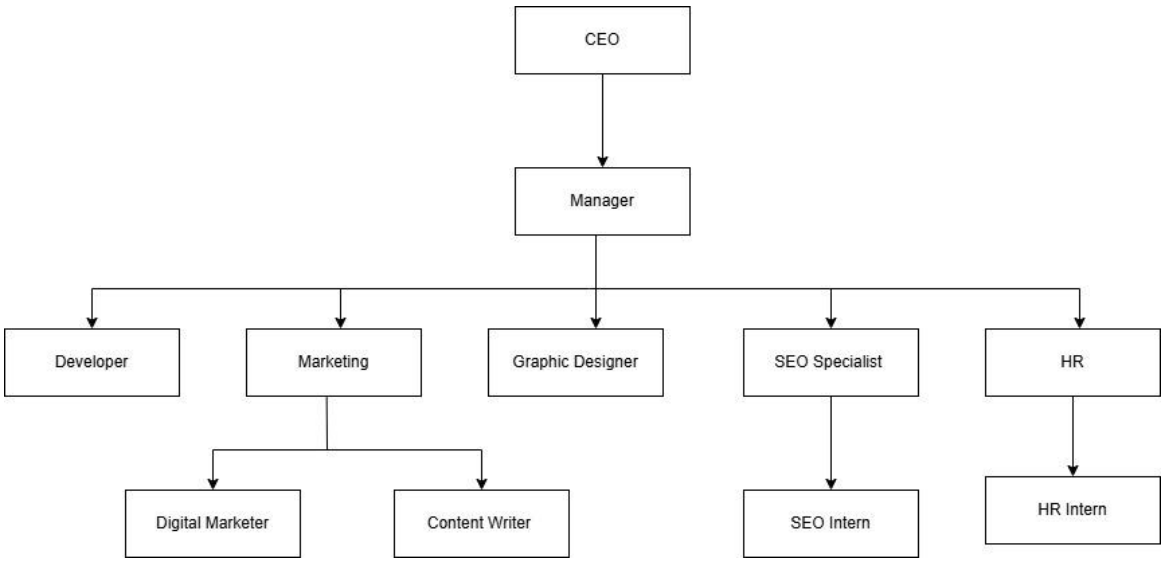

Figure 2.2: Organization of Hierarchy Sathi EdTech PVT.LTD.

2.3 Working Domain of the Organization

Sathi EdTech PVT.LTD. operates in several key domains to comprehensive digital solutions and individuals. These include:

- **Development:** Customer website design and development tailored to client needs. Development of static, dynamic and e-commerce websites using modern frameworks.
- **Recruitment and outsourcing:** Supports companies by hiring skilled candidates and providing outsourcing services like HR and digital marketing, helping businesses focus on their core activities while improving efficiency.
- **Search Engine optimization:** Improving website rankings on search engines through on-page and off-page optimization. Conducting keyword research, link building and performance monitoring.
- **Digital Marketing:** Designing logos, banners, brochures and other branding materials. Creating visually appealing graphics for websites and marketing campaigns.
- **Training and support:** Provides training in digital marketing, SEO, and recruitment by teaching practical skills and industry tools. It also offers continuous guidance and support to help individuals apply their knowledge effectively in real-world tasks.

2.4 Description of Working Department/Unit

During the internship at Sathi EdTech, the intern was part of the SEO (Search Engine Optimization) department. The department focuses on enhancing website visibility on search engines, increasing organic traffic, and ensuring effective digital marketing strategies for the organization and its clients. The team employs a variety of tools and techniques to improve website ranking and user engagement.

The intern was assigned to work under the guidance of a mentor, an experienced SEO specialist with extensive knowledge of the industry. The mentor provided valuable guidance and support throughout the internship, helping the intern understand the organization's SEO strategies, workflows, and best practices.

The responsibilities of the intern included conducting keyword research to identify high-ranking opportunities, optimizing on-page elements such as meta titles, descriptions, and headers, and analyzing website performance using tools like Google Search Engine. Additionally, the intern worked on link-building strategies to improve domain authority and contributed to creating SEO-friendly content. The department followed a systematic approach, conducting regular team meetings to review progress, set goals, and evaluate

outcomes. The team utilized various SEO tools, including SEMrush, Ahrefs, and Ubersuggest, to measure performance and refine strategies.

Beyond technical SEO skills, the intern also learned about digital marketing, analytics, and the importance of user experience (UX) in driving website engagement. This internship provided a comprehensive understanding of search engine optimization and its role in digital marketing.

Overall, the internship experience at Sathi EdTech Pvt. Ltd. was highly valuable. The intern gained hands-on experience in SEO, learned from knowledgeable professionals, and developed both technical and analytical skills. The intern is grateful for the opportunity to contribute to the team and has grown both professionally and personally through this experience.

CHAPTER 3

BACKGROUND STUDY AND LITERATURE REVIEW

3.1 BACKGROUND STUDY

Search Engine Optimization (SEO) is a vital element of digital marketing that focuses on enhancing a website's visibility on search engine result pages (SERPs). As online platforms continue to grow, businesses increasingly depend on SEO strategies to attract organic traffic and improve conversion rates. SEO works by optimizing different aspects of a website, including its content, technical structure, and overall design, to align with the ranking algorithms of major search engines such as Google, Bing, and Yahoo.

In recent years, SEO has developed from a specialized skill into a widely adopted industry practice. Both small enterprises and large organizations now invest heavily in SEO to strengthen their online presence and remain competitive in the digital marketplace. This growth is largely driven by the rising influence of search engines on consumer decision-making and the continuous evolution of search engine algorithms, which require businesses to constantly adapt their strategies.

The responsibilities of SEO professionals have also become more advanced and specialized, covering areas such as on-page optimization, link building, keyword research, and technical SEO. Effective SEO is not limited to improving rankings; it also involves understanding user intent and delivering high-quality, relevant content that enhances user experience. Additionally, staying updated with algorithm changes is essential for maintaining and improving search performance. This discussion highlights how SEO techniques are applied in practice through internship experience, focusing on the tools and strategies used to improve website visibility.

As explained by Fishkin and Høgenhaven (2013), the responsibilities of SEO professionals have become more advanced and specialized, covering areas such as on-page optimization, link building, keyword research, and technical SEO. Effective SEO is not limited to improving rankings; it also involves understanding user intent and delivering high-quality, relevant content that enhances user experience. Additionally, staying updated with algorithm changes is essential for maintaining and improving search performance.

According to Patel (2020), SEO is a long-term strategy that helps businesses achieve sustainable online visibility and improved return on investment (ROI). This discussion highlights how SEO techniques are applied in practice through internship experience, focusing on the tools and strategies used to improve website visibility.

3.2 Literature Review

SEO has proven to be one of the most effective strategies for increasing organic traffic and enhancing online business growth. SEO refers to the practice of optimizing a website's content to increase its ranking on search engine results, thereby improving visibility. Moz emphasizes the importance of understanding both the technical and content-related aspects of SEO to ensure that search engines can efficiently crawl and index a website. (Moz. (2025). *The beginners guide to SEO*. Moz. https://www.moz.com/beginners-guide-to-seo)

Search engine optimization is not only important for businesses looking to boost their online presence, but it also plays a significant role in influencing consumer purchasing decisions. We can discuss the substantial impact of SEO on consumer behavior. particularly how higher search rankings correlate with increased trust and engagement from users. As consumers tend to trust the first few search results, businesses that fail to optimize for SEO risk losing valuable website traffic to competitors.

SEO's relationship with business growth has been widely studied. An effective SEO strategy can significantly improve e-commerce businesses by making their websites more accessible to potential customers. By focusing on keyword optimization, link building, and site speed, e-commerce sites can increase their chances of ranking higher on SERPs, thereby improving their conversion rates. In this context, businesses that prioritize SEO over traditional forms of digital marketing are likely to experience higher growth and better returns on investment.

The technical aspects of SEO are crucial for ensuring that websites perform optimally across all devices. The crucial factors, such as mobile optimization, fast loading times, and clean website code, contribute to better user experiences and higher search engine rankings. Google’s algorithms, for instance, have placed increasing emphasis on mobile-friendliness and page load speed in their ranking criteria. Tools like Google Page Speed Insights are essential for monitoring and optimizing website performance, as highlighted in the SEO resources.

Additionally, link building is a strategy that involves acquiring external links to your site (Backlinko. (2022). *The beginner's guide to SEO*. Backlinko. https://backlinko.com/seo-guide), which plays a vital role in boosting SEO. The importance of acquiring high-quality backlinks to improve domain authority and search rankings. SEO professionals use a variety of link-building techniques, such as guest blogging, outreach, and content marketing, to attract valuable backlinks from reputable sources.

CHAPTER 4

INTERNSHIP ACTIVITIES

4.1 Roles and Responsibilities

During my internship period as an SEO Intern under the mentorship of Kunal Sah, SEO Specialist at Sathi Edtech, I worked on many areas of SEO such as keyword research, building backlinks, blog posting and so on. The main activity during the internship includes:

4.1.1 SEO and Strategy Development: Conducting research to find out the popular keywords and the content that would increase the organic traffic to the website.

4.1.2 Performance Analytics: Using tools such as Google Search Console to track the performance of the website. Along with that, using other tools like SEMrush to conduct keyword research and Screaming Frog to conduct a technical audit.

4.1.3 Content Management: Writing proper content for the websites with proper keyword usage and managing the keyword density as well, so that the rank would be increased for the website with the assistance of tools like Neo Writer.

4.1.4 Optimization of Technical SEO: Optimizing the technical aspects of the website, such as responsiveness, mobile friendliness, loading speed, and so on, for a better user experience.

4.2 Weekly Log

Table 4.2:Week log of internship period

Week and Date	Tasks/Activities	Challenges
Week 1 Sep 1- Sep 5, 2025	• Develop an Understanding of the organization's structure. • Build fundamental knowledge of SEO practices. • Worked on optimizing site speed for better performance.	• Adjusted to organizations workflow and process. • Learned to use internal tool effectively. • Adapted to professional work environment.

Week 2 Sep 7 – Sep 12, 2025	• Initiated on-page SEO for the Fish Hut website including keyword research. • Improved meta title and description. • Improved URL structuring for better SEO performance. • Enhanced proficiency in using Google Docs and Google Sheets.	• Selected effective keywords based on search volume and competition. • Managed multiples google workplace tools effectively.
Week 3 Sep 14 – Sep 19, 2025	• Performed technical SEO using Screaming frog for site auditing. • Conduct mobile friendly testing for InternSathi. • Used Google PageSpeed insights to improve website speed. • Identifying technical elements affecting website performance.	• Difficulty to understand issues. • Limited control over speed issues.\ • Trouble identifying technical issues.
Week 4 Sep 21 – Sep 26, 2025	• Detailed keyword research for InternSathi. • Used SEO tools to refine keyword selection strategy • Competitor Analysis • Organize and documented keyword using google sheets for effective tracking.	• Difficulty selecting the most effective keywords. • Limited data for accurate competitor analysis.
Week 5 Oct 12 – Oct 17, 2025	• On-page SEO for InternSathi. • Did technical SEO for Hireshore. • Conduct mobile friendly testing and pagespeed insights to improve website speed.	• Difficult to understand and find out issues. • Challenges in mobile optimization.

Week 6 Oct 26 – Oct 31, 2025	• Performed keyword research using Ahrefs and SEMrush. • Improved URL structure for SEO. • On-page SEO. • Competitor analysis. • Fixed crawl errors to improve indexing for hireshore.	• Difficulty managing and large keyword datasets. • Challenges to fixing crawl-related issues. • Difficult in finding relevant competitors for analysis.
Week 7 Nov 2 – Nov 7, 2025	• Did keyword research for TalentSathi. • 1 month Content Planning. • Competitor Analysis. • Technical audit for TalentSathi. • Did On-page SEO.	• Difficulty finding relevant keywords for TalentSathi. • Challenges in planning consistent content for 1 month. • Challenges in completing a detailed technical SEO audit for TalentSathi.
Week 8 Nov 9 – Nov 14, 2025	• Learned to write content briefs and content for TalentSathi. • Planned content structure and SEO focus. • Wrote SEO- optimization content for blogs. • Use Neuron Writer for content Optimization.	• Difficulty understanding how to structure effective content brief. • Challenges in SEO content planning. • Struggled with SEO blog writing.
Week 9 Nov 16 – Nov 21, 2025	• Created content brief on recruitment practices and job portals for WordPress CMS.	• Difficulty in content brief creation. • Challenges in SEO content planning.

	• Planned SEO-Focused Content brief. • Optimized content using WordPress CMS features like Rank Math. • Created images using Canva.	• Issues using Rank Math optimization • Time takes for Canva design.
Week 10 Nov 23 – Nov 28, 2025	• Created content brief and content on how to reduce time to hire and building a talent pipeline for TalentSathi. • Created SEO optimized blog content with targeted keywords. • Created images using Canva.	• Difficulty in structuring content briefs and content writing. • Challenges in selecting and using targeted SEO keywords effectively. • Struggled with blog optimization.
Week 11 Nov 30 – Dec 5, 2025	• Created Content brief and content on the topic of Recruitment pricing in Nepal. • Created image according to content title. • Searched nap listing web sites.	• Difficulty to predict exact price. • Challenges in designing relevant images based on content topics. • Time-consuming process of finding and analyzing Nepal listing websites.
Week 12 Dec 7 – Dec 12, 2026	• Nap listing for TalentSathi. • covering keywords, backlinks, traffic analysis, and technical performance. • Prepared and submitted a detailed internship report with findings and recommendations.	• Difficulty in managing NAP listing for TalentSathi accurately. • struggled with interpreting SEO metrics and performance insights. • Time-consuming process of preparing a detailed internship report.

4.3 Description of Projects Involved During Internship

During my SEO internship at Sathi Edtech, I was involved in various projects that aimed to enhance the search engine visibility and performance of multiple websites. Below is a detailed description of the projects I worked on:

4.3.1 Fishut Aqua

Worked on Fishut (Fishut Aqua), an Australia-based e-commerce platform specializing in fish and aquarium products, with a primary focus on enhancing online visibility and improving search engine rankings. The work involved conducting comprehensive keyword research to identify high-performing and relevant search terms that could attract targeted organic traffic. Based on this research, on-page SEO elements such as meta titles, meta descriptions, and URL structures were optimized to align with search engine algorithms and user intent. Additionally, product descriptions were refined to be more informative, keyword-rich, and user-friendly, while internal linking strategies were improved to strengthen site structure and navigation.

Furthermore, technical SEO audits were performed to identify and resolve issues affecting website performance, including broken links, duplicate content, and crawl errors. Efforts were made to improve Core Web Vitals, enhance site speed, and ensure better crawlability and indexing by search engines. These optimizations not only contributed to better search engine rankings but also significantly improved the overall user experience, making the website more accessible, efficient, and engaging for visitors.

4.3.2 InternSathi

Worked on InternSathi, an online job portal designed for freshers and students in Nepal, with the main objective of improving online visibility and achieving higher rankings on search engine results pages. The project specifically targeted users seeking internships and entry-level job opportunities, making it essential to align content with their search intent. To achieve this, on-page SEO techniques were implemented by strategically placing relevant keywords in blogs, service pages, and other website content, ensuring better discoverability and engagement.

In addition, a technical SEO audit was conducted using tools such as Google PageSpeed Insights to evaluate the website's performance and identify key areas for improvement. Based on the analysis, necessary optimizations were made to enhance Core Web Vitals,

particularly metrics like First Contentful Paint (FCP) and Largest Contentful Paint (LCP), which are crucial for user experience and search rankings. Efforts were also directed toward improving site speed, fixing performance issues, and enhancing overall usability. These improvements contributed to a better user experience, increased website efficiency, and stronger overall search engine performance.

4.3.3 Hireshore

Worked on Hireshore, an offshoring service platform aimed at serving a global audience, with a strong focus on improving search engine performance and expanding international reach. The work involved optimizing website content using carefully selected long-tail keywords to target specific user queries and improve ranking opportunities in less competitive but highly relevant search segments. Special attention was given to targeting trekking-related service keywords to capture niche traffic and enhance visibility among users searching for specialized services.

In addition to on-page optimization, blog posts were created to promote Hireshore's services, educate potential clients, and drive organic traffic to the website. Existing content was also regularly updated to improve keyword relevance, readability, and alignment with current SEO practices. This included refining headings, improving content structure, and ensuring proper keyword placement without affecting content quality.

Furthermore, content optimization strategies were implemented to enhance user engagement, such as improving internal linking, making content more informative and user-friendly, and ensuring a smooth navigation experience. These combined efforts contributed to increased organic traffic, better search engine visibility, and a stronger online presence in international markets, ultimately helping the platform reach a wider and more relevant audience.

4.3.4 TalentSathi

Worked on TalentSathi, a Nepal-based recruitment service company, with a strong focus on enhancing online visibility and improving overall search engine performance in a competitive job market. The process began with in-depth keyword research to identify high-performing and relevant search terms related to recruitment, job hiring, internships, and career opportunities. This helped in understanding user intent and targeting both job

seekers and employers effectively. The selected keywords were strategically implemented across the website to maximize organic reach and improve ranking potential.

To further strengthen on-page SEO, key elements such as meta titles, meta descriptions, and URL structures were carefully optimized to make them more search engine friendly and appealing to users, ultimately improving click-through rates (CTR). In addition, high-quality blog content was created regularly, focusing on career tips, job search guidance, and industry insights. This not only helped in targeting a wider range of keywords but also positioned TalentSathi as an informative and trustworthy platform in the recruitment sector.

Internal linking strategies were also implemented to create a clear and logical website structure, guiding users smoothly from informational content to important service pages such as job listings and recruitment services. This improved navigation, reduced bounce rates, and increased user engagement. Furthermore, continuous monitoring and analysis of website performance were carried out to identify areas for improvement, ensuring that SEO strategies remained effective and up to date.

Overall, these efforts significantly enhanced user experience, increased organic traffic, and strengthened the website's presence on search engine results pages, contributing to better engagement and improved performance of the TalentSathi platform.

SEO Reports and Analytics

Monitoring and evaluating SEO performance is an essential part of ensuring that digital marketing strategies are effective and continuously improving. During this task, the focus was on tracking SEO activities across all projects to measure their impact and identify areas for optimization.

The SEO performance was regularly monitored using Google Search Console, where key metrics such as website traffic, user engagement, and keyword rankings were analyzed. This helped in understanding how well the website was performing in search results. In addition, SEO reports were created and presented to stakeholders, which included detailed analysis of traffic sources, conversion rates, and overall campaign effectiveness. These reports provided valuable insights for decision-making and helped in refining future SEO strategies.

4.4 Tasks / Activities Performed

During my SEO internship at Sathi Edtech, I was assigned a variety of tasks and responsibilities that allowed me to apply SEO concepts practically. Below are the key tasks and activities I performed:

- **Key word Research and Optimization**

Conducted comprehensive keyword research using advanced SEO tools such as Ubersuggest, Ahrefs, and SEMrush across multiple projects, including Fishut Aqua, InternSathi, Hireshore, and TalentSathi. The process involved analyzing search volume, keyword difficulty, competition level, and user intent to identify high-traffic and relevant keywords that could effectively improve search visibility. Both short-tail and long-tail keywords were considered to target a broader audience while also capturing niche search queries with higher conversion potential.

Based on the insights gathered, key on-page SEO elements such as meta titles, meta descriptions, and URL structures were optimized to align with selected keywords and best SEO practices. Special attention was given to writing compelling and keyword-rich meta descriptions to improve click-through rates (CTR) by making search results more attractive and informative to users. URL structures were also simplified and made more descriptive to enhance readability and search engine indexing.

These optimizations played a crucial role in improving search engine rankings by helping websites appear more relevant to search queries. Additionally, continuous monitoring and refinement of keyword strategies ensured sustained performance improvements over time. As a result, there was a noticeable increase in organic traffic, better user engagement, and improved CTR, ultimately contributing to the overall success of the SEO campaigns across all projects.

Figure 4.1: Keyword Research and Optimization in SEMrush

- **On-Page SEO Optimization**

During the internship, on-page SEO optimization was performed across multiple projects, including TalentSathi, InternSathi, Hireshore, and Fish Hut Aqua, with the aim of improving search engine rankings and overall website performance. Blog posts and service page content were optimized using carefully selected target keywords to ensure better alignment with user search intent. Special attention was given to improving content readability by maintaining a clear structure, proper formatting, and natural keyword placement, making the content both user-friendly and search engine optimized.

In addition, internal linking strategies were strengthened to create a well-structured website architecture, allowing users to navigate easily between related pages while also improving crawlability for search engines. Descriptive alt text was added to images to enhance accessibility and support image-based SEO, while heading structures (H1, H2, etc.) were properly organized to improve content hierarchy and indexing.

Furthermore, title tags and meta descriptions were optimized across all platforms to make them more relevant, engaging, and keyword-rich, helping to improve click-through rates and visibility on search engine results pages. Blog writing, particularly for TalentSathi, played a key role in driving organic traffic and providing valuable information to users. Overall, these on-page SEO efforts significantly enhanced website performance, increased organic reach, and improved user engagement across all the projects.

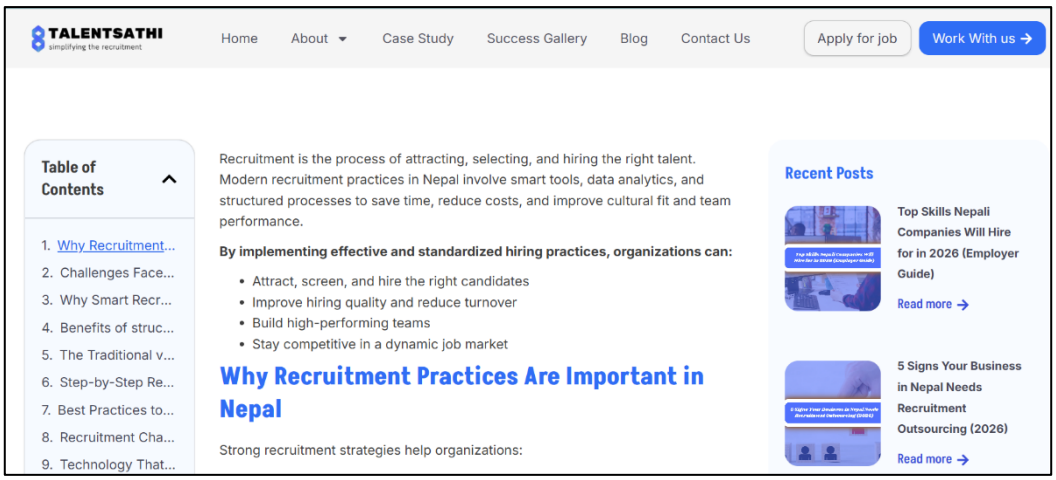

Figure 4.2: On-Page SEO Optimization on TalentSathi

- **Content Creation and Optimization**

During the internship, significant contributions were made to content creation and SEO optimization across multiple platforms, with a strong focus on improving search visibility and user engagement. For TalentSathi, SEO-friendly blog content was created using relevant and high-performing keywords, ensuring that each article was informative, engaging, and well-structured to meet both user needs and search engine requirements. Before writing, detailed content briefs were prepared to outline target keywords, topics, and structure, which helped maintain consistency and effectiveness in content strategy. Tools like NeuronWriter were used for keyword optimization, while the Hemingway Editor was utilized to enhance readability and ensure clarity of the content.

Content management and SEO performance were handled using WordPress along with the Rank Math plugin, which assisted in optimizing on-page elements and maintaining proper SEO scores. In addition to creating new content, existing blog posts for Hireshore were updated by incorporating new keywords, improving formatting, and adding updated and relevant information to keep the content fresh and competitive. Visual elements were also enhanced using Canva to design attractive blog images, making the content more appealing and engaging for users.

Overall, these combined efforts in content creation, optimization, and updating significantly improved search engine visibility, increased organic traffic, and enhanced user engagement across the platforms.

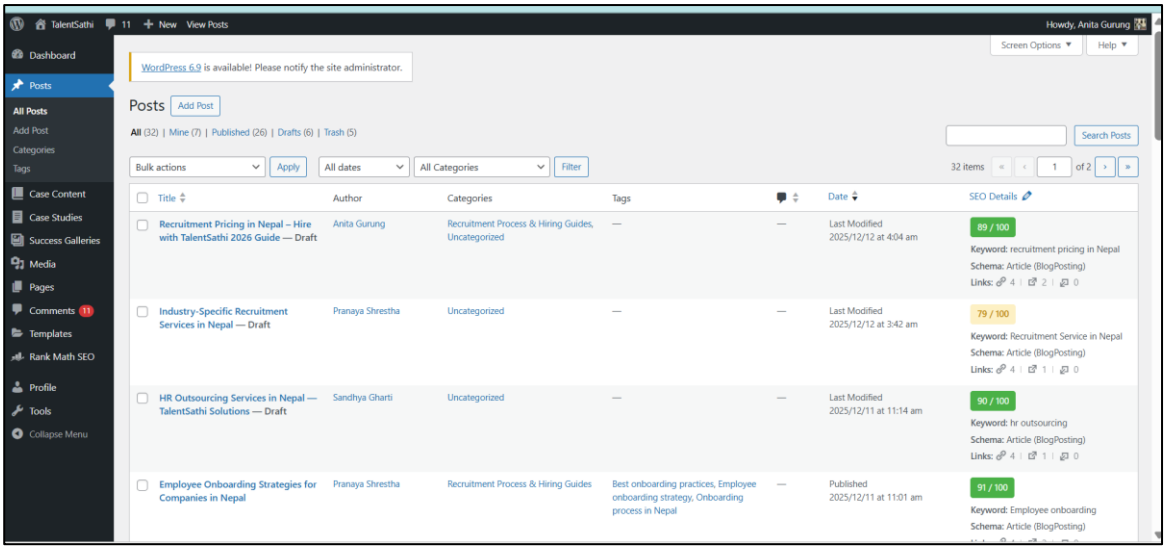

Figure 4.3: Content creation and optimization in TalentSathi

- **Technical SEO**

During the internship, technical SEO audits were conducted to enhance website performance, crawlability, and indexation across multiple projects. Google PageSpeed Insights was used to evaluate site speed and measure Core Web Vitals such as Largest Contentful Paint (LCP) and First Contentful Paint (FCP). Based on the analysis, improvements were implemented to optimize page loading speed, reduce performance issues, and provide better user experience.

Several technical issues were also identified and resolved, including broken URLs, redirect errors, outdated pages, and indexing problems. Re-indexing requests were submitted to ensure that updated and optimized pages were properly crawled and indexed by search engines. Important SEO files like robots.txt and sitemap.xml were reviewed and optimized to guide search engine boots effectively, while canonical tags were properly implemented to prevent duplicate content issues and improve ranking signals.

In addition, Screaming Frog SEO Spider was used to perform detailed technical audits, which helped in detecting issues such as broken links, missing meta tags, duplicate content, and crawl errors. These issues were systematically fixed to improve overall site structure and ensure better SEO health. Overall, these technical SEO activities significantly

improved website performance, strengthened crawlability and indexation, and contributed to better search engine visibility and overall, SEO results.

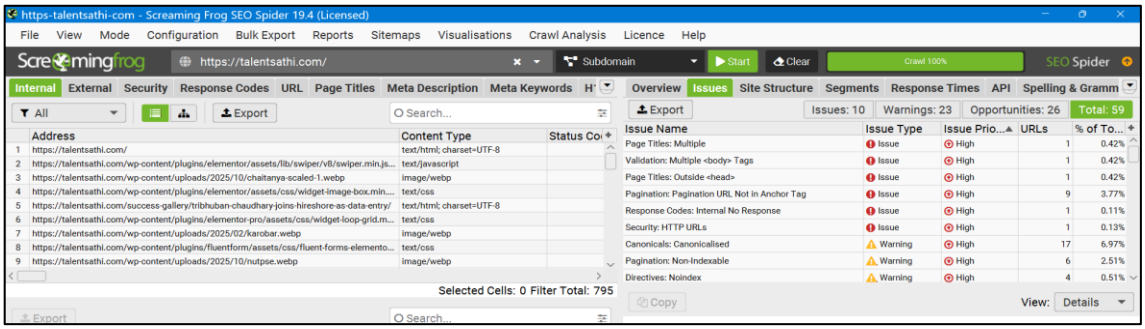

Figure4.5: Conducting technical SEO using Screaming frog

- **Link Building and Off-Page SEO**

During the internship, off-page SEO activities were implemented for TalentSathi with the aim of improving online visibility, domain authority, and overall search engine performance. A key part of this work involved executing link-building strategies by acquiring high-quality backlinks from relevant recruitment-related blogs, directories, and forums. These backlinks helped increase website credibility and improved its ranking potential on search engines.

In addition, consistent NAP (Name, Address, Phone Number) listings were created and managed across various online platforms such as B2B Map, Yellow Pages, MeroSewa, and other business directories. Maintaining accurate and consistent business information across these platforms helped strengthen local SEO and improved trust signals for search engines.

Furthermore, business details and content were submitted to relevant directories, and blog posts were actively promoted on social media platforms like Facebook and LinkedIn. This helped drive referral traffic, increase brand awareness, and enhance user engagement. Overall, these off-page SEO efforts significantly contributed to improving TalentSathi's online presence, credibility, and search engine visibility within a short period of time.

- **SEO Reporting and Analysis**

During the internship, website performance was continuously monitored and analyzed using Google Search Console for platforms such as TalentSathi and InternSathi. This involved tracking key metrics such as traffic trends, user behavior, indexing status, and keyword performance to understand how users interacted with the websites. Important indicators like impressions, clicks, click-through rate (CTR), and keyword rankings were carefully evaluated to identify underperforming pages and uncover opportunities for optimization. This analysis helped in understanding which content was performing well and which areas required improvement.

In addition to monitoring, detailed SEO reports were prepared to present insights on organic traffic growth, keyword positions, and overall SEO health of the websites. These reports provided a clear overview of performance and progress over time. Based on the findings, actionable recommendations were suggested, including content optimization, improvement of meta tags, strengthening internal linking, and resolving technical SEO issues. This data-driven approach supported better decision-making and contributed to enhancing overall SEO effectiveness, leading to improved search visibility and user engagement.

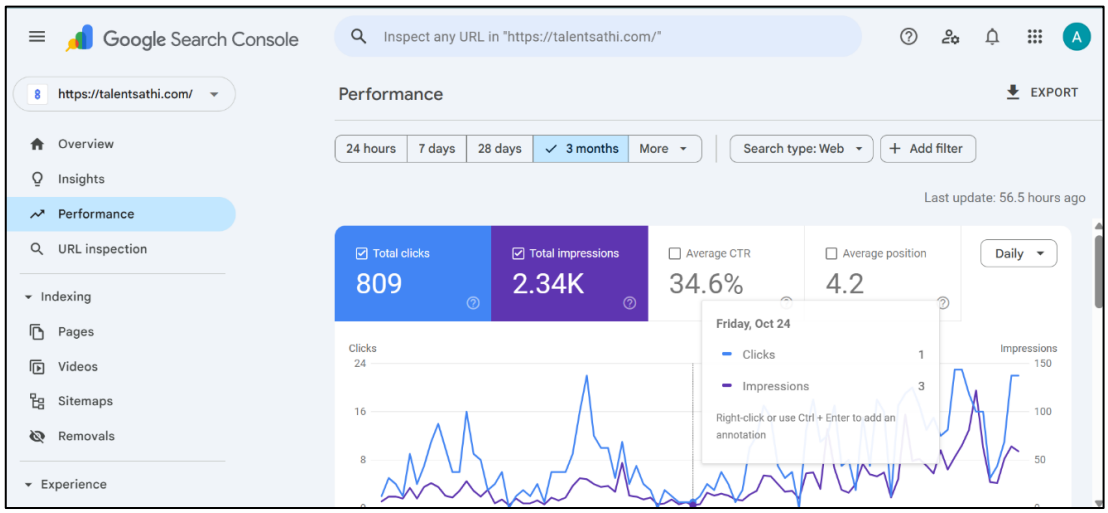

Figure 4.7: Data from Google Search Console

- **Image Creation**

During the internship, visual content was created for TalentSathi to support blog articles, web pages, and overall digital marketing efforts. Canva was used as the primary tool to design engaging visuals such as banners, thumbnails, infographics, and social media posts. Each design was carefully aligned with the content topics and brand guidelines to maintain consistency and improve communication effectiveness.

The visuals were created not only to enhance the appearance of the website but also to increase user engagement by making the content more attractive and easier to understand. Special attention was given to ensuring that the designs were professional, clear, and relevant to the target audience. In addition, images were optimized for web use by adjusting file sizes for faster loading and adding proper SEO elements such as alt text to improve accessibility and search engine visibility.

Overall, these visual content creation efforts significantly enhanced the user experience of TalentSathi by improving content presentation, increasing engagement, and strengthening brand identity across both website and social media platforms.

4.5 Tools Used:

- Screaming Frog

Screaming Frog was used to carry out technical SEO audits and identify hidden issues that affect website performance. It was important because technical errors like broken links, duplicate pages, and missing tags can reduce search rankings. The Intern Used this tool to scan websites, detect such issues, and fix them to improve crawlability and ensure search engines could properly access index pages.

- Google PageSpeed Insights

This tool was used to check and improve website speed and performance. It was important because page speed affects both user experience and search rankings. The intern used it to

identify slow-loading elements and applied fixes such as image compression and code optimization to enhance website performance.

- SEMrush

SEMrush was mainly used to plan and improve SEO strategies through keyword research and competitor analysis. It was important for understanding what users are searching for and how competitors are performing. The intern Used it to find high ranking keywords,

analyze competitor websites, and track keyword positions, which helped in optimizing content and improving visibility.

- Aherfs

Ahrefs was used to strengthen off-page SEO through backlink analysis and competitor research. It was important because backlinks play a key role in improving domain authority

and rankings. The Intern Used Ahrefs to analyze competitor backlinks, identify linking opportunities, and improve the website's backlink profile.

- Ubersuggest

Ubersuggest was used to support keyword research and content idea generation. It was important for discovering new keyword opportunities and understanding search trends. The Intern Used it to find relevant keywords and plan content that aligns with user search behavior.

- Neuron Writer

Neuron Writer was used to improve content quality and ensure it meets SEO requirements. It was important for creating content that matches search for intent and ranks well. The Intern Used it to analyze competitor content, include relevant keywords, and optimize headings and structure to produce more effective and competitive content.

- WordPress

WordPress was used to manage and publish website content efficiently, while Rank Math helped optimize that content for SEO. These tools were important for maintaining well-structured, SEO-friendly websites. The Intern Used them to upload blogs, optimize meta tags, improve keyword usage, and ensure readability and proper on-page SEO practices.

- Canva

Canva was used to create visual content that supports SEO and marketing efforts. It was important because attractive visuals improve user engagement and content appeal. The Intern Used Canva to design blog images and social media graphics, helping increase audience interaction and brand consistency.

- Google Search Console

Google Search Console was used to monitor how websites perform in Google search results. It was important because it provides real-time data directly from Google. The Intern Used it to track clicks, impressions, and keyword rankings, identify indexing issues, and request indexing of updated pages to ensure better search visibility.

CHAPTER 5

CONCLUSION AND LEARNING OUTCOMES

5.1 Conclusion

The internship as an SEO Intern at Sathi Edtech Pvt. Ltd. proved to be a valuable and successful learning experience. All the initial objectives set at the beginning of the internship were effectively achieved through practical implementation and continuous monitoring.

On-page SEO optimization was carried out by refining meta tags, improving internal linking, and enhancing keyword relevancy across web pages. In addition, in-depth keyword research was conducted to identify high-performing search terms and effectively target the relevant audience. Off-page SEO strategies, including link-building activities, were also implemented to improve website authority and online visibility. Regular use of professional tools such as Google Search Console enabled consistent tracking and analysis of website performance. Furthermore, SEO-friendly content creation was successfully executed through collaboration with the content team.

Working on projects such as Fishut Aqua, InternSathi, and TalentSathi provided hands-on experience in understanding search engine rankings, website performance, and overall, SEO health. Along with technical skills, the internship also contributed to the development of communication, teamwork, and problem-solving abilities. Overall, this experience built a strong foundation for a future career in digital marketing, and all internship goals were successfully accomplished.

5.2 Learning Outcomes

During the internship, significant expertise in search engine optimization and digital marketing techniques was developed. Key takeaways include:

- **Keyword Research:** Conducted comprehensive research using tools such as Ahrefs and SEMrush to target high-performing keywords relevant to the industry.
- **On-Page Optimization:** Refined meta tags, internal linking structures, and website content to improve search engine rankings.

- **Technical SEO:** Resolved critical technical issues, including crawl errors and page speed bottlenecks, to enhance website performance and Core Web Vitals.
- **Off-Page Strategies:** Developed and implemented link-building strategies to acquire quality backlinks and improve domain authority.
- **Content Collaboration:** Collaborated with teams to create SEO-friendly content for blogs and landing pages, following E-E-A-T principles.
- **Performance Monitoring:** Utilized Google Search Console to monitor website metrics and prepare detailed SEO performance reports to drive data-driven optimizations.
